Figure 1. The effect of the concentration of the *Salmonella* suspension on the detection of *Salmonella* in the feces of the mice. The mice were infected with *Salmonella* at a concentration of 10^8 CFU/g of the feces. The concentration of the *Salmonella* suspension was 10^8 CFU/g of the feces. The detection of *Salmonella* in the feces of the mice was determined by the presence of *Salmonella* in the feces. The detection of *Salmonella* in the feces of the mice was determined by the presence of *Salmonella* in the feces.
